

INTEGRASPEC[®]

"The User Friendly ICF"

FEATURE PROJECT

Project: Family Vision Center

Creston, Iowa

Architect / Engineer: Laugerman and Associates

West Des Moines, Iowa

General Contractor: Cornerstone Commercial

Corning, Iowa

ICF Installer: TEK Builders Inc.

Mt. Ayr, Iowa

ICF Distributor: IntegraSpec Midwest

Mt. Ayr, Iowa

Features: This 4,200 ft² professional building features masonry and Hardie Board, complete with 6" reinforced concrete core IntegraSpec[®] wallsystem.

Benefits: IntegraSpec[®] wallsystem provided a fast and accurate construction. 6" IntegraSpec[®] walls 12' high were poured to the top in one lift eliminating potential cold joints and saving pump time and labour costs.

"As always, this wall was poured with no problems or form failures. We pumped 55 cubic yards in 280 linear feet of 12' wall in one hour and forty five minutes. That saved pump time versus the time it took when we built with other ICFs, and the form waste filled only one large garbage bag. Incredible!!"
