

INTEGRASPEC[®]

"The User Friendly ICF"

TECHNICAL REVIEW

Shown: 53' trailer holding 7200 ft² finished wall space

TRANSPORTATION

IntegraSpec[®] material comes shipped to warehouse or site in compact lightweight bundles wrapped in plastic. Webs are shipped in boxes with easy to lift handling slots.

Advantages:

- Transportation costs are less since more material can fit into the transport.
- Material can be stored outside, protected from weather and sunlight with white plastic wrapping.

Shown: 37ft² of finished wall space on his shoulder

Material Handling

IntegraSpec[®]'s manageable bundles are wrapped in white plastic, protecting the material from UV, wind, snow, and freezing rain.

Eighteen standard panels make up the 48" x 25" x 22.5" lightweight bundle for easy lifting. Webs are boxed in quantities of 216 pieces and can be distributed throughout the site for easy access.

Shown: Shipment for 1200 ft² foundation, eight units high

TRUCK AND 16' TRAILER

Delivery made simple and effortless.

Advantages:

- Material can be shipped more easily to less accessible sites.
- Inventory can be kept and delivered to site whenever necessary.
- Excellent on site management.
