IntegraSpec Residential

Why choose an ICF for your next home?

IntegraQuiet

Imagine a home that is so quiet you can't hear the busy traffic, wind, lawnmower or most external noises. You can retreat to your own peaceful sanctuary and escape the busy world.

IntegraSpec® can do that for you when building your next home.

IntegraSafe

Imagine a home that can defend against hurricanes, tornados and even thieves with monolithic concrete walls, reinforced with steel. Definitely stronger than the old stick frame house. **IntegraSpec®** can do that for you when building your next home.

IntegraFlexible

The unique, patented design offers concrete walls from 4" to almost any thickness. The independent panels allow simple transitioning for unlimited contours, thicknesses and finishes. Big or small, complex or straightforward, any design can be built with **IntegraSpec®**.

IntegraSpec

Specify Integrity in your next project. Please contact a qualified representative to discuss the award winning **IntegraSpec®**.

IntegraSavings

Imagine saving up to 70% of your heating and cooling costs for your home. That means cutting your energy bills and putting that money back into your pocket. **IntegraSpec®** can do that for you when building your next home.

IntegraHealthy

Imagine a home that promotes healthy indoor air quality. Walls which prohibit mould and mildew growth and provide better living conditions for an overly allergenic & asthmatic inflicted nation. **IntegraSpec®** can do that for you when building your next home.

IntegraFast

Fast, quick construction including structural superior walls, super insulation, strapping, air & moisture barriers all in one step. No need for extra framing. Also better during winter construction, eliminating the need to tarp and/or add expensive heaters.
